# Return of the Webform

Exploring the evolution of the Webform module

# About

Nick Tubbs

# Stickers

# Webform in Drupal 7

- It's a very easy to use module out of the box

- Treated as a content type

- Submissions can be emailed to end user and admin

- Results can be downloaded as csv, or manipulated into a view

# Webform vs Entityform

- More developer oriented form solution

- Uses the Drupal field system

- Powerful as a result

# Webform in Drupal 8?

He's dead, Jim.

# Just Kidding!*

*Kind of

# Webform in Drupal 8

- Yaml form to the rescue

- Same principles of D7 module

- But more powerful

# What's Great About the 8 Version?

- Plethora of elements available for use

- Access Control

- Documentation

- Support

# Why You Should Use It

- Customizable like no other

- Can build really powerful forms

- Almost a standalone tool itself

- Active developer

# Why You Should Not Use It

- It's super powerful and therefore more complex

- You loathe forms
